This Seminar Is For You If...

- You step in wet spots on the carpet a few times a week
- You find a "gift" when you clean behind the couch
- Your dog comes *inside* and then eliminates on the carpet
- You think your dog is house trained because "they only have an accident once or twice a week"
- You think it's too late or that your dog cannot learn new potty habits
- You haven't brought your dog home yet... but want them to succeed at house training from the start!

The Curriculum:

- Why they do what they do where (and when) they do it
- Three areas of focus for successful training
- Proper rewards for good behavior
- How to create good, lasting habits
- Proper ways to deal with inappropriate elimination
- What are reasonable expectations of your dog?
